The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Formula 2 of claim 1 terminates with a * symbol. This * symbol is not defined by the claim.

Claim 2 states that "the alkoxy groups are arranged block by block". It is not understood how this limitation adds to the block nature of the alkoxy groups already defined by the formula.

Claim 6 states that "formula 1 represents an ester or partial ester". It is not understood how this requirement can be met at the same time that the structural requirements of the formula are met. Where is the ester linkage to be and what acid or alcohol is esterified?

Appropriate clarification is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by

Boinowitz et al '123.

Boinowitz et al disclose block copolymeric emulsifiers suitable for use with pigments (column 1, lines 5-28). These copolymers are taught as comprising alkylene oxide and styrene oxide blocks and a terminal phosphoric acid ester moiety (see column 2, lines 37 to 67). The limitations placed on the indices m, n, k, x and y of the instant formula are seen as met by the corresponding indices of the reference.

Therefore the reference anticipates the rejected claims.

Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
